## SKILLS

### LANGUAGE

- Java
- JavaScript
- Python
- Dart
- Html/Css

### DATABASE

- MySQL
- Firebase Realtime Database

### FRAMEWORK/LIBRARY

- React JS
- Flutter
- Angular
- Spring MVC
- Spring Boots
- Bootstrap

## DESCRIPTION

- I recent graduate of CodeGym Center's full-stack development course in Da Nang, previously worked as a refrigeration and air conditioning engineer for 5 years after graduating from Da Nang University of Technology.
- During the CodeGym course, he consistently ranked first on the center's leaderboard for two months and secured the runner-up position in the national algorithm competition, Hackathon, in the third month.
- I received a project award in 2019 and was recognized as an outstanding employee in 2020 at Searee Company.
- With his expertise and experience, I'm confident in efficiently handling assigned tasks and managing pressure. I'm eager to contribute my skills and experiences to your company's dynamic environment and looks forward to discussing how I can be a valuable asset to your team.

## HONORS & AWARDS

**2023/09/05** Hackathon - National Algorithm Competition

**2021/02/08** Searee - Outstanding Employee

## WORK EXPERIENCE

**WEB FULL STACK AND MOBILE APP DEVELOPER** **12-2023 - Now**

**BITI HIGHTECH**

**JAVA WEB FULL STACK DEVELOPER** **6/2023 - 12/2023**

**CODEGYM DANANG**

**M&E ENGINEER - SHOPDRAWING** **2022 - 2023**

**DOANNHAT JSC M&E PROFESSIONAL CONTRACTOR**

**M&E ENGINEER - BIM MANAGER** **2018 - 2022**

**SEAREE CORPORATION**

## EDUCATION

**REFRIGERATION AND AIR CONDITIONING INDUSTRY** **2013 - 2018**

**DANANG UNIVERSITY OF SCIENCE AND TECHNOLOGY**

## CERTIFICATIONS

**2024/03/03** Software Engineer Certificate

**2024/02/27** Angular (Intermediate) Skill Certificate

**2024/02/26** Rest API (Intermediate) skill Certificate

**2024/02/24** Frontend Developer (React) Certificate

**2024/01/21** JavaScript (Intermediate) Skill Certificate

**2024/01/21** SQL (Intermediate) skill Certificate

2024/01/02	Software Engineer (Intern) Certificate
2023/12/29	Python (Basic) skill Certificate
2023/11/24	JavaScript (Basic) Skill Certificate
2023/11/24	Problem Solving (Intermediate) Skill Certificate
2023/11/24	SQL (Advanced) Skill Certificate
2023/10/15	SQL (Basic) skill Certificate
2023/10/13	Java (Basic) Skill Certificate
2023/08/02	Problem Solving (Basic) Skill Certificate

PROJECTS

MOBILE DEVELOPER, BACKEND DEVELOPER

ABC - LOGISTIC - 2 Weeks

Project description

The Management Software is tailored to enhance inventory operations for logistics businesses, focusing on efficiency, accuracy, and real-time visibility. It facilitates seamless creation and management of inbound and outbound orders, enabling users to handle new shipments and customer orders effortlessly. The software offers intuitive tools for tracking every step of the process, from item allocation to shipment dispatch. With inventory tracking capabilities, users can conveniently monitor the location and status of each item within the warehouse. Integration with QR code scanning and IoT devices allows for real-time monitoring of warehouse activities.

Technical

- MySql
- SpringBoots
- ORM
- Hibernate
- Flutter
- Dart

PROGRAMMER

LQT - SERVICE (PERSONAL PROJECT) - 2 Weeks

Project description

The project connects individuals with electrical and plumbing repair needs to skilled technicians. It features a 3D model of ThangQuoc Apartment, enhancing user experience with interactive CSS and JS elements. A time management feature linked to a 3D map enables easy tracking of job assignments and navigation. Real-time chat technology ensures seamless communication for administrators, users, and employees, while Redux synchronizes states across components. Security is maintained through JWT, enabling scalability across different device platforms.

Technical

- Revit
- Enscape
- Photoshop
- Firebase Store
- Realtime Database
- React JS
- Redux
- Javascript & XML
- SpringBoots
- ORM
- Hibernate

**LEADER, GIT MANAGER, PROGRAMMER**

**EROS05 - DATING**

**- 3 Weeks**

**Project description**

The team developed a dating website, functioning as a social network with interactive features like virtual gifting. It provides a user-friendly environment for connecting, engaging, and fostering relationships. The platform integrates modern web technologies for an intuitive and visually appealing experience, enhancing user interaction and socialization.

**Technical**

- Firebase Store
- Realtime Database
- React JS
- JPA
- SpringBoots
- ORM
- Hibernate

**LEADER, 3D MODEL CREATION, CRUD FOR PARKING LOTS, HOMEPAGE DEVELOPMENT**

**PARKINGLOT**

**- 2 Weeks**

**Project description**

The Parkinglot Management project efficiently manages parking spaces within ThangQuoc Apartment. It utilizes Autodesk Revit to create a 3D model, rendered via Enscape. CSS, JS, and Ajax are incorporated to provide interactive 3D functionalities for parking management, selection, and notifications.

**Technical**

- Revit
- Enscape
- Photoshop
- Firebase Store
- Spring Framework
- ORM
- JPA
- Hibernate
- Thymeleaf
- SpringBoots
- AJAX
- JQuery

**LEADER, CRUD OPERATIONS FOR VILLAS, HOMEPAGE DEVELOPMENT**

**Project description**

The Booking Villa project involves a team of four individuals collaborating on villa booking and management. It includes functionalities for managing users, employees, and villas.

**Technical**

- MySQL
- Bootstrap
- JSP
- Servlet
- JDBC
- JSTL
- Firebase Store
